Assignment - I

(Problem solving methods)

Date -
17/2011

Q.1 what is an algorithm? write advantages & disadvantages of an algorithm?

→ "An algorithm is a finite set of sequence of rules for solving specific types of problem."

✓ Advantages -

- 1) It is a step-wise representation of a solution to a given problem which makes it easy to understand.
- 2) An algorithm uses a definite process.
- 3) It is not dependant on any programming language, so it is easy to understand for anyone even without programming knowledge.
- 4) every steps in an algorithm has its own logic sequence so it is easy to debug.

5) by using algorithm the problem is broken down into smaller pieces or steps hence, it is easier for programmer to convert it into an actual programme.

Disadvantage -

- 1) Algorithm is time consuming
- 2) difficult to show branching & looping in algorithms.
- 3) big tasks are difficult to input in algorithms.

Q.2 what is flow chart? draw a flow chart to find largest number between any three given numbers.

→ "A symbolic or pictorial representation of an algorithm is called flow chart."

Q.3 What is algorithm? write an algorithm to find smallest number betw'nt three given numbers

→ "An algorithm is a finite set of sequence of rules for solving its specific types of problem."

Problem -

Step-1 - start

"2 - Declare variable say $n_1, n_2 \text{ & } n_3$

"3 - Read the values $n_1, n_2 \text{ & } n_3$

"4 - If n_1 is less than $n_2 \text{ & } n_1$ is less than n_3 then go to step-7

"5 - If n_2 is less than n_3 then go to step-8

"6 - Display n_3 is smallest no. then go to step-9

"7 - Display n_1 is smallest number then go to step-9

Q.4 what is flow chart? write advantages and disadvantages of flow chart.

→ "A pictorial or symbolical representation of an algorithm is called flow chart."

Advantages -

① Better explanation of programme - flow charts is a pictorial representation of any programme.

✓ The programme created by it can be easily understood.

② Effective analysis - throughout the flow chart the programme is divided into smaller parts making effective analysis of the programme.

③ Designing of programme - using a flow chart your programme can be designed correctly.

④ Communication - flow charts are better way of communicating the logic of the system to all concerned or involved.

⑤ Proper debugging - the flow charts helps in debugging process.

⑥ Efficient programme maintenance - the maintenance of operating programme becomes easy with the help of flow charts.

Disadvantages -

① Complex logic - complex logic sometimes the programme logic is quit complicated. In that case flow charts becomes complex.

② alterations & modifications - If alterations are

4) People need - To understand what the syntax meaning.

Q.5 short note on - what are the types of error
→ There are two types of errors in C program such as - ① compile time ② run time error

1) compile time error - syntax error & systematic errors indicated by the compiler

syntax error -

① errors due to the fact that the syntax of language is not respected. A possibility that there could be a spelling error.

② that could have to deal with variables more than anything.

③ A possibility is that semicolons are missing at the end of statements

④ missing parentheses

⑤ printing the value of variable without declaring it.

2) Run Time error - errors which occur during programme execution (run time) after successful compilation are called run time errors. One of the most common run time error is division by zero also known as division error.

e.g // compile time errors

#

#

void main()

printf ("welcome to C-programming)
getch();

3

✓ O/P: error: missing semicolon.

Step 5 :- Open print dialog box.

Step 6 :- You can give number of copy's you want
to print.

Step 8 :- Then click on print button.

You document is print. as same as you can
see in word.

Q4) Ms. office :-

→ Sout meance a bondle of a different things.

→ Office sout meance a bondle of different
office work in one pakage.

→ "Ms. office" has produced by Microsoft this
application soft ware voidly use in home,
college, school, business etc.

"Ms-office is a suit type software application that are bundled, company in one package."

Features of Ms-office

① Word processing :-

In word processing you can write text or text file. Using Microsoft word we can create book, letter, articles, memos etc.

You using Microsoft word you can create visiting card, menu card, etc. Microsoft word provide different feature.

Tabulation of document :-

For tabulation of document you can use ms-excel. Using ms-excel you can perform numerical operation such mathematical operation like addition, subtraction, division, multiplication & modulus.

Using ms-excel you can also perform logical operation or statistical as well as trigo matrical operation.

Using excel you can insert graph, clip art etc features.

Data base management :-

For data base management you can use Ms-access. In data base management also include Front-end & back end. → where document is save & when you can access saved document.

transfer Information :-

For transfer information or communication to each other you can use ms-outlook.

For communication you use email but it is essential of internet.

Graphs :-

For graphs you can use ms-power point. Ms-power point is also use for slide show presentation in group of a people comes together.

Create web-page :-

For create web-page you can use ms-front-page. using microsoft Ms-front page non professional web-designer create a web page.

Q5]

Q. Word Art :-

in ms-word word art option is available. Suppose you want to insert a picture in your document in that case word art is used.

Step 1 :- Open your document

Step 2 :- place your cursor where you want to insert a picture.

Step 3 :- Then click on insert menu.

Step 4 :- Then click on picture tab.

Step 5 :- Select picture from the list.

Step 6 :- Click on insert.

Thus the picture are just inserted in your document, word art is complete.

Q2] Important features of ms-word.

- ① Using ms-word you can write a text.
- ② Using ms-word you can write a letter or mail merge.
- ③ Using ms-word you can create or write book, articles & memos etc.
- ④ Using ms-word you can create hotel menu card, visiting card.
- ⑤ You can prepare your resume.

② MAX():-

max() is use for findout maximum number in given range.
for example :-

The range of number is given as

32, 45, 35, 72, 82, 90.

$$\text{max} = \text{max}(32, 45, 35, 72, 82, 90)$$

max number = 90.

③ MIN():-

min() is use for findout the minimum number in a given range.
for example :-

The range of number is given as
follow

32, 45, 35, 72, 82, 90.

$$\text{min} = \text{min}(32, 45, 35, 72, 82, 90)$$

min number = 32.

④ SQRUT():-

~~A~~ SQRUT meance. Squar Rut. SQRUT() is used for calculate. rute of a specific number.

For example :-

number = 81

= SQRUT(81)

square rut = 9

⑤ POWER():-

Power function is used for ~~pose~~ calculate power of a given number.

for ex :-

number = 5

power = 3

$5^3 = 125$.

Components of Ms-office :-

- ① Ms-word
- ② Ms-excel
- ③ Ms-power point
- ④ Ms-access
- ⑤ Ms-outlook
- ⑥ Ms-front page.

① Ms-word :-

Ms-word is used for documentation purpose.

using ms-word you can create or write text, book, articles, memos etc.

② Ms-excel :-

ms-excel is used for numerical calculation purpose.

using ms-excel you can perform mathematical operations like addition, subtraction, division, multiplication & modulus.

using ms-excel you can also perform logical arithmetical, trigonometrical or statistical operations.

③ Ms-power point :-

Ms-power point is used for slide-show presentation. slide-show presentation is used for essential in group of a people comes together.

④ Ms-access :-

Ms-access is used for in ms data base

management.

Ms - outlook :- ms - outlook is use for communication outside of work or office.

Ms - front page :-

Ms front page is used for create web-page.

Q7 Short note.

A7 Write any four functions in Ms - excel.

- ① ROUNDUP ()
- ② MAX ()
- ③ MIN ()
- ④ SQRT ()

① ROUND () :-

The round function is used for round up of digits.

ex :- 32.3479 this number you can want to display only for 2 digits. so you can use round () .

number = 32.3479

round up number = 32.35.
