Zoom Meeting Lectures

The image displays two screenshots of a Zoom meeting interface. The left screenshot, taken at 10:55, shows a list of 15 participants. The right screenshot, taken at 10:54, shows a list of 13 participants. Both lists include names and initials, along with icons for video, audio, and chat. The participants listed are:

- Amol Shinde (Host, mic)
- Abhijeet mali
- Gauri Chavan
- Karishma shikalgar
- Monika Bhosale
- PRATHAMESH SURYAWANSHI
- rushikesh jadhav
- Sakshi Kale
- Sandesh Chavan
- Sanskruti kurale
- Shivani Bhopale
- Shubhangi shirtode

prediction and regression

descriptive data for predict a value and in second method the predicted algorithms select current data for predict a values. The lots of techniques are used for prediction techniques that are as follows-

1. Nearest neighbour
2. Natural network
3. Bayes classifier
4. Decision tree

Regression-

The regulation means that calculating a predicted values with only on numeric data. Regression used the statistical method or technique for finding prediction values. The regression can use relationship between one or more independent variables and find a final result. The scalability of a regression is depend upon which type of data are in data set.
